## Short Tipped Bite Stick

The Short Tipped Bite Stick is manufactured out of a high impact plastic that is similar to stainless steel and will not flex or bend like older bite sticks. A sure grip handle is provided that makes it much easier to grip, even when the surface is wet. A swirl design is used on the metal tip, making it much easier to grip bands and much more efficient. The tip of the bite stick is shorter than standard bite sticks, making it easier to maneuver and work with in the mouth.
